Quang-Hoa Hong, P.Eng.
Exploitation Engineer
Canadian Natural Resources Limited
2100, 855 – 2nd Street SW
Calgary, AB T2P 4J8

Dear Mr. Hong:

**RE: OBSERVATION WELL WITHDRAWAL
CNRL ET AL UNIT W EAGLE A6-31-84-18 (WA 6411)
EAGLE WEST – BELLOY ‘A’ UNIT 1**

The subject well was drilled in 1985 and completed in the Belloy ‘A’ pool in 1986. The well was used for oil production from 1986 to 1989 before being converted to an injection well 1990. The well was used for injection until 2007 and was granted observation status in April of 2017. The last reservoir pressure test conducted in the well was completed in February 2018 and Canadian Natural Resources Limited has consented to the withdrawal of the observation designation.

The Drilling and Production Regulation Part 1 defines an observation well as “a well or a portion of a well designated as an observation well under section 2 (7)”.

- 2 (7) An official may designate a well as an observation well if
- (a) the well is being used to monitor reservoir pressures or to obtain other formation information, and
 - (b) the well is not used to produce from, or inject or dispose of fluids into, a formation being monitored.

The observation well designation is hereby withdrawn for CNRL et al Unit W Eagle A6-31-84-18 (WA# 6411), for the Eagle West Belloy ‘A’ pool. The well will no longer be used to monitor reservoir pressure.

Should you have any questions, please contact Logan Gray at (250) 419-4465 or the undersigned at (250) 419-4430.

Sincerely,

Ron Stefik, P.L. Eng.
Supervisor, Reservoir Engineering
Oil and Gas Commission
