Kaylyn Schnell, P.Eng.
Exploitation Engineer, BC North
Canadian Natural Resources Limited
2500, 855 – 2nd St SW
Calgary, AB T2P 4J8

Dear Ms. Schnell:

**RE: OBSERVATION WELL DESIGNATION WITHDRAWAL
CNRL ET AL HZ NIG a-A48-D/94-H-3 (WA# 29012)
NIG CREEK FIELD – HALFWAY FORMATION**

The subject well was drilled and completed into the Montney formation in 2013, however due to casing integrity issues, no production occurred and the Montney zone was abandoned in February of 2015. The Halfway zone was subsequently completed for disposal, and disposal approval was granted in May 2015. Disposal into the Halfway occurred from 2015 to 2017, with a cumulative disposal volume of 34.9 e³m³, at which time reservoir pressure was measured to be above the approved maximum. The well was granted observation status to observe pressure dissipation in October of 2017 and pressure was measured at below the approved maximum in August of 2018. The latest reservoir pressure test was obtained in June of 2022. On July 10, 2024, CNRL communicated via email that they had no further plans for disposal or observation in the Halfway formation in the subject well.

The observation well designation under section 2(7) of the *Drilling and Production Regulation* is hereby withdrawn for *CNRL et al HZ Nig a-A48-D/94-H-3 (WA# 29012)*, for the Halfway formation. The well will no longer be used to monitor reservoir pressure.

Should you have any questions, please contact Logan Gray at (250) 419-4465 or the undersigned at (250) 419-4430.

Sincerely,

Ron Stefik, P.L.Eng.
Supervisor, Reservoir Engineering
Energy Regulator
