Dear Mr. Schulte:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
ARCHEAN NOEL d-38-K/93-P-1; WA# 11751**

The Commission has reviewed your application dated August 20, 1999, requesting permission to commingle gas production from the Cadotte and Falher B zones encountered in the subject well.

The Commission has designated the gas pools in this well to be Cadotte "G" and Falher B "F" of the Noel field.

Canadian Hunter, operator of gas wells located in these pools, was asked to comment about your request for commingling in the subject well. In a letter dated October 4, 1999 Canadian Hunter has presented good arguments against commingling at this time. We concur that their concerns are valid.

In view of this, your application for commingling cannot be approved at this time. However, we would be prepared to reconsider an application at later date once the size of producing pools has been fully established.

Sincerely,

Bou van Oort, P. Eng.
Director
Engineering and Geology Branch
