Mr. David Moore, P. Eng.
Sr. Reservoir Engineer
Canadian Forest Oil Ltd.
Suite 2000
800 – 6th Avenue SW
Calgary AB T2P 3G3

Dear Mr. Moore:

**RE: REQUEST FOR COMMINGLED PRODUCTION
Cdn Forest et al Rigel b-22-A/94-A-15; (WA 8530)**

The Commission has reviewed your application dated July 27, 1999, requesting permission to commingle gas production from the Bluesky and Dunlevy zones.

The Commission maps the productive Bluesky in this well as part of the Buick Creek Bluesky "C" gas pool. The Dunlevy zone in this well appears to be potential but it has not been perforated. As the Dunlevy has not been completed in this well, flow rate, possible fluid content and pressures have not been established.

In view of this, your application for commingling cannot be approved at this time. Please note that we would be prepared to reconsider an application at a later date when the Dunlevy zone is completed and flow rate, fluid content and pressures are available.

Should you have any questions, please contact Peter Attariwala at (250) 952-0311 or Ron Stefik at (250) 952-0310.

Sincerely,

Craig Gibson
Manager, Reservoir Engineering
Engineering and Geology Branch
