

OIL AND GAS COMMISSION

April 15, 2004

6490-2600/2700-59070-20
OGC - 04144

Nam Pui, P.Eng.
Exploitation Engineer
Canadian Natural Resources Limited
2500, 855 - 2nd Street S.W.
Calgary AB T2P 4J8

Dear Mr. Pui:

**RE: APPROVAL FOR COMMINGLED PRODUCTION
CNRES ET AL OSBORN d-46-J/94-A-9; WA# 12762**

The Commission has reviewed your application dated March 11, 2004 for approval to commingle gas production from the Bluesky and Gething zones encountered in the subject well.

The Commission designates the gas pools under application to be the Osborn - Bluesky "A" and Gething "A".

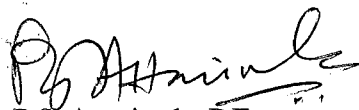

Approval to commingle production from these same two pools was granted for the nearby well a-A33-J/94-A-9 (WA# 8319) on January 9, 2004, due to low production rates and loading issues. Completion information on the subject well d-46-J indicates that the zones are in fact now in communication behind casing via induced fractures. Gas analyses appear to be similar for the two pools. Commingled production is expected to increase the productive life of this well, thereby increasing recoverable reserves.

We wish to advise you that your application to commingle production from these zones is hereby granted approval, under the authority of Section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Bluesky (1052.0 - 1055.5 mKB) and Gething (1071.0 - 1074.0 mKB) formations may be commingled.
2. Gas, water and condensate production should be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Bluesky 60 % and Gething 40%. The allocation factors may be amended to reflect results of any future tests.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

The requirements for measurement and reporting of the initial reservoir pressure and AOF for the Gething zone, under Sections 84 and 95 of the *Drilling and Production Regulation*, are hereby waived.

Sincerely,

P.S. Attariwala, P.Eng.
Supervisor
Reservoir Engineering
