Dear Ms. Mactaggart:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
CNRL OSPREY a-45-J/94-A-15; WA# 3729**

The Commission has reviewed your application dated February 28, 2000, requesting permission to commingle gas production from the Bluesky and Halfway zones encountered in the subject well.

The Commission has designated the gas pools encountered by this well to be Osprey – Bluesky “A” and Halfway “A”.

The Halfway zone produces somewhat sour gas while Bluesky gas is sweet. There is lack of recent reservoir pressure data from either pool, therefore current reservoir pressures are unknown.

Your application can not be approved at this time. In order to further consider this application we would require a valid recent reservoir pressure test for the two pools, as well a letter of consent from Encal Energy Ltd., the operator of the well Encal Osprey a-13-J/94-A-15, producing from the same Osprey Halfway “A” pool.

Should you have any questions, please contact Ron Stefik at (250) 952-0310.

Sincerely,

B. van Oort, P. Eng.
Director
Engineering and Geology Branch
