Dear Ms. Ho:

**RE: APPROVAL FOR COMMINGLED PRODUCTION
Devon Apache Martin b-84-E/94-H-6; WA# 7816**

The Commission has reviewed your application dated January 20, 2006 requesting approval to commingle gas production from the Baldonnel and Halfway zones encountered in the subject well.

The Commission has designated the gas pools under application to be the Martin - Baldonnel "A" and Halfway "A".

Both are mature pools producing sweet gas. Previous approvals have been granted to commingle these same two pools in several other wells. Commingling is expected to increasing the productive life of the pools, thereby increasing recoverable reserves.

We wish to advise you that your application to commingle production from these zones is hereby granted approval, under the authority of Section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Baldonnel (1171.0 - 1184.0 mKB) and Halfway (1288.5 - 1292.0 mKB) formations may be commingled.
2. Gas, condensate and water production should be allocated on the Ministry of Small Business and Revenue BC S-1 and BC S-2 forms on the basis of Baldonnel 85 % and Halfway 15%. The allocation factors may be amended to reflect results of any future tests.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Sincerely,

Richard Slocomb, P. Eng.
A/Director
