Calgary AB T2P 2Z5

Dear Ms. Whelen:

**RE: APPROVAL FOR COMMINGLED PRODUCTION  
HOME ET AL MARTIN d-95-E/94-H-6; WA# 8907**

The Commission has reviewed your application dated October 16, 2003 for approval to commingle gas production from the Baldonnel and Halfway zones encountered in the subject well.

The Commission has designated the gas pools under application to be the Martin - Halfway "A" and Baldonnel "E".

Both are mature pools producing sweet gas. Other wells have been previously approved to commingle production from these same pools, increasing the productive life of the wells, thereby increasing recoverable reserves. Your application requests interim approval to commingle production, however the OGC has sufficient information to issue a final approval.

We wish to advise you that your application to commingle production from these zones is hereby granted approval, under the authority of Section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Baldonnel (1174.0 - 1181.0 mKB) and Halfway (1289.5 - 1292.5 mKB) formations may be commingled.
2. Gas production should be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Baldonnel 50 % and Halfway 50%. The allocation factors may be amended to reflect results of any future tests.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Sincerely,

Peter Attariwala, P. Eng.  
Supervisor  
Reservoir Engineering
