Dear Ms. Cowitz:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
DECL ET AL RIGEL d-39-B/94-A-15; WA# 14609**

The Commission has reviewed your application dated May 14, 2002 requesting permission to commingle gas production from the Cecil and Dunlevy/Gething zones encountered in the subject well.

The Commission has designated these gas pools as the Rigel - Dunlevy "F" and Cecil "A".

Gas compositions are similar for the two pools, both at an advanced state of depletion. There are no equity concerns as Dominion Exploration Canadian Ltd. operates all wells in the Cecil "A" pool and surrounding Dunlevy "F" gas wells. Commingled completion is expected to increase the productive life of the well thereby increasing the recoverable reserves from both pools.

We wish to advise you that your application to commingle production from these two formations is hereby approved, under the authority of section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Dunlevy (1057.5 - 1059.0 mKB) and Cecil (1149.0 - 1151.5 mKB) formations may be commingled.
2. Gas, condensate and water production should initially be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Dunlevy 50% and Cecil 50%. The allocation factors may be amended to reflect results of any future tests.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Sincerely,

Peter Attariwala, P. Eng.
Supervisor
Reservoir Engineering
