G.H. Grimsrud, P. Eng., M.Sc.
Contract Production Engineer
EnCana Corporation
P.O. Box 2850
Calgary AB T2P 2S5

Dear Mr. Grimsrud:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
AEC MONIAS 3-21-81-22 W6M; WA# 13050**

The Commission has reviewed your application dated November 21, 2002 requesting permission to commingle gas production from the Charlie Lake and Halfway zones encountered in the subject well.

The Commission has designated the gas pools under application to be the Monias - Lower Charlie Lake Sands "A" and Halfway "U". As noted in your application, gas compositions and reservoir pressures are expected to be similar for both pools. Commingled completion is expected to increase gas production from otherwise marginal zones, thereby increasing recoverable reserves.

We wish to advise you that your application to commingle production from these two pools is hereby approved, under the authority of section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Lower Charlie Lake Sands (1653.0-1656.0 mKB) and Halfway (1687.0-1693.0 mKB) zones may be commingled.
2. Gas, condensate and water production should be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Lower Charlie Lake Sands 70% and Halfway 30%.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Sincerely,

Peter Attariwala, P. Eng.
Supervisor
Reservoir Engineering
