Dear Ms. Chomiak:

**RE: COMMINGLED PRODUCTION APPROVAL
AEC SWAN a-29-H/93-P-9; WA# 10385**

On August 14, 1998 the Commission approved the commingled production of the upper and lower Montney zones encountered in the subject well, mapped as Other Areas (outside of any recognized field boundary). At the time of approval very limited information was available regarding the size or production characteristics of these zones, initially treated as separate pools with two unique well identifiers (UWIs). Subsequent mapping, based on additional development locations, has placed both intervals within the Swan Lake Montney "A" pool.

Therefore, the commingling approval of August 14, 1998 is hereby rescinded, as per condition #3 of the approval. All production from the interval 2448.0 – 2692.0 mKB should now be reported to the initial completion event, UWI 200A029H093P0900.

Should you have any questions please contact Ron Stefik at (250) 952-0310.

Sincerely,

Peter Attariwala, P. Eng.
Supervisor
Reservoir Engineering
