Dear Mr. Krug:

**RE: INTERIM COMMINGLED PRODUCTION APPROVAL  
PC DOMCAN JEDNEY a-44-J/94-G-1; WA# 13898**

The Oil and Gas Commission has reviewed your request dated June 7, 2001, requesting interim approval to commingle gas production from the Baldonnel/Upper Charlie Lake and Halfway zones at the subject well location. We understand that prior approval is sought pending additional well stimulation and test results.

As noted in your application, the OGC has previously approved commingled production from these same pools for a number of wells, in order to increase recoveries. The subject location is within an approved gas GEP area for both zones.

We wish to advise you that your application to commingle production from these pools is hereby granted interim approval, under the authority of section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. A production test must be completed on each zone prior to commingling, gathering sufficient data to establish the AOF and reservoir pressure. Reports must be filed as per the requirements of sections 84 and 95 of the *Regulation*.
2. A formal application for commingled production, with supporting log and test data must be submitted, with proposed allocation factors for production reporting.
3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Should you have any questions, please contact either Peter Attariwala at (250) 952-0311 or Ron Stefik at 952-0310.

Sincerely,

Craig Gibson, P. Eng.  
Manager  
Reservoir Engineering and Geology
