CALGARY AB T2P 3M3

Dear Mr. Ellithorpe:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
POINTWEST BOUNDARY N 03-33-087-14 W6M; WA# 14999**

The Commission has reviewed your application dated October 22, 2003 requesting permission to commingle production from the Coplin and Halfway zones encountered in the subject well.

The Commission has designated these pools as the Boundary Lake North – Coplin “B” and Halfway “L” non-associated gas pools. Production data is available for each zone, the Coplin producing sweet gas, the Halfway slightly sour. The applicant, Pointwest Energy Inc., is currently the operator all wells in both pools. Commingled production should extend the economic life of this well, thereby maximizing reserves recovery.

We wish to advise you that your application to commingle production is hereby approved, under the authority of Section 41 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Coplin (1336.8–1337.8 mKB) and Halfway (1389.0–1393.5 mKB) zones may be commingled.
2. Gas, condensate and water production should be allocated on the Ministry of Provincial Revenue BC S-1 and BC S-2 forms on the basis of Coplin 30% and Halfway 70%.
3. During periods of extended shut-in, the sliding sleeve must be in the closed position for zonal isolation.
4. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Should you have any questions, please contact the undersigned at (250) 952-0311 or Ron Stefik at (250) 952-0310.

Sincerely,

Peter Attariwala, P.Eng.
Supervisor
Reservoir Engineering
