Dear Mr. McDougall:

**RE: APPLICATION FOR COMMINGLED PRODUCTION
SUNCOR ET AL BLUEBERRY d-57-D/94-A-13; WA# 1333**

The Ministry has reviewed your application dated October 30, 1997, requesting permission to commingle Debolt "B" oil and Dunlevy "B" gas production from the subject well.

Comments solicited from stakeholders in the pools have not raised objections to the application. Commingling of production should provide operations economics while not adversely effecting oil recoveries.

Your application to commingle production from these two formations is hereby approved, under the authority of section 44 of the *Drilling and Production Regulation*, subject to the following conditions:

1. Production from the Debolt and Dunlevy formations may be commingled for the well located at d-57-D/94-A-13.
2. Oil, condensate, gas and water production should be allocated on the BC S-1 and BC S-2 forms on the following basis:

	<u>Debolt</u>	<u>Dunlevy</u>
Oil	100%	
Condensate		100%
Gas	100% up to 650 m ³ /m ³ GOR	100% above 650m ³ /m ³ GOR
Water	100%	

.../2

3. This approval may be modified at a later date if deemed appropriate through a change in circumstances.

Yours sincerely,
