Petro-Canada Project (04)

Dear Mr. Rehm:

**RE: CONCURRENT PRODUCTION APPROVAL
SECTION 24-85-14 W6M
BOUNDARY LAKE - HALFWAY "E" & "F" POOLS**

The Commission has reviewed your letter dated February 28, 2003, requesting clarification on the application requirements for commingled production approval for the well PC Newport Boundary 14-24-085-14 W6M (WA# 10627), Boundary Lake Halfway "E" & "F" pools.

The "E" and "F" pools, in close vertical proximity, appear to be in communication via perforations and/or well fracture stimulations in some wells. This production in a commingled state was originally identified in a Concurrent Production approval dated March 21, 1984 for section 24-85-14 W6M. This approval was later amended on December 6, 1989, recognizing production from both pools, up to a total daily oil allowable of 24.5 m³/d and a gas limit of 34.4 e³m³/d.

Therefore, the well 14-24-085-14 may be produced from both zones without further approval. We note that Halfway gas production from section 24 has been recently exceeding the allowable limit and remind Petro-Canada that this restriction must be enforced.

Sincerely,

Craig Gibson, P. Eng.
Manager
Reservoir Engineering and Geology
