Esso Project (03)

Dear Sirs:

**RE: GOOD ENGINEERING PRACTICE APPROVAL
NOEL FIELD - CADOTTE "A" POOL**

A Good Engineering Practice (GEP) approval was issued March 28, 1989 (copy attached) for a portion of the Noel field Cadotte "A" pool. Avenir Operating Corp. and Peregrine Energy Ltd. are the current registered owners of Petroleum and Natural Gas lease 12660, containing the rights within this approval area.

The purpose of the subject GEP approval was to remove the individual well daily gas allowable (DGA) on the well Avenir et al Noel a-29-D/93-P-8 (WA# 6845), the sole producing well within the approval area. Prior to January 1, 1990, all producing gas wells were subject to an individual well DGA, limiting the production rate. However, under the current *Drilling and Production Regulation*, a DGA would no longer apply to this well.

As the original sole purpose of the GEP approval was to remove the individual well DGA, the Commission is considering rescinding the approval. Should your company have reason why this should not occur, please respond in writing to this office no later than February 4, 2005.

Should you have any questions, please contact Ron Stefik at (250) 952-0310.

Sincerely,

Craig Gibson, P. Eng.
Director
Resource Conservation Branch
